## **DETAILED ACTION**

### ***Examiner's Amendment***

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Theodore Naccarella on March 3, 2005.

The application has been amended as follows.

Claim 17, line 1: the number "17" was changed to the number -- 16 ---.

### ***Allowable Subject Matter***

2. Claims 1-7 and 9-26 are allowed.
3. The following is an examiner's statement of reasons for allowance.

The limitations that are primarily responsible for distinguishing the claims of this application over the prior art are the limitations concerning the radiation element is generally planar and the reflector is U shaped and comprises a generally planar surface parallel to the radiation element and wherein the distance between the generally planar surface of the reflector and the radiation element is a maximum of one-thirteenth of a wavelength for a signal in the AMPS band.

Proper motivation was not found in the prior art to combine references disclosing these limitations with the references disclosing the other limitations recited in the claims of this application.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Drawings***

4. The drawings filed on March 4, 2004 are acceptable subject to correction of the informalities contained in the drawings. In order to avoid abandonment of this application, correction is required in reply to the Office action. The correction will not be held in abeyance.
